2 Years and 6 Months - **Audiovisual Designer**

EOS Technology

6 Months (Currently Working) - **Audiovisual Designer**

Passionate about all things audiovisual, I embarked on a lifelong project by connecting with the media since high school in technical design workshops, radio and various artistic processes that allowed me to learn more about audiovisuales and fall in love with them to the point of continuing my studies in the same line.

During my studies, I stood out for my focus on 2D and 3D animation, motion graphics, and video post-production, a line in which I continued to develop professionally through projects such as short films, commercials, contests, and other challenges that required me to acquire even more knowledge in the different related topics.

I believe my current strengths lie in the areas of video editing, post-production, and motion graphics animation. These skills, combined with my experience and design knowledge, make my work your best option.

I can't wait to work together!

Juan O.
